2026 OT Medicare Billing Reference

For [Client] Providers • Effective: 01/01/2026

Provider Support Document

CPT Code Library and 2026 Medicare Rates

Reference: Based on ZeeMed's [Client] CPT and Billing Configuration Review (August 2026). Includes codes identified for review and activation.

CPT Code	Description	Time / Unit	2026 Medicare Avg	Modifier	Notes
97110	Therapeutic exercises	15 min, 1 unit	$37.94	GP	8 Minute Rule
97112	Neuromuscular re-education	15 min, 1 unit	$39.22	GP	8 Minute Rule
97129	Therapeutic interventions, Initial	15 min, 1 unit	$41.50	GP	8 Minute Rule
97130	Therapeutic interventions, Add-on	15 min, 1 unit	$34.75	GP	8 Minute Rule
97165	OT Eval, Low complexity	30 min, 1 unit	$89.15	GP	Documentation required
97166	OT Eval, Moderate complexity	45 min, 1 unit	$117.32	GP	Documentation required
97167	OT Eval, High complexity	60 min, 1 unit	$154.88	GP	Documentation required
97168	OT Re-evaluation	30 min, 1 unit	$74.50	GP	Documentation required
97530	Therapeutic activities	15 min, 1 unit	$43.75	GP	8 Minute Rule
97535	Self-care and home management training	15 min, 1 unit	$42.18	GP	8 Minute Rule
97537	Community and work reintegration	15 min, 1 unit	$44.30	GP	8 Minute Rule
97750	Physical performance test	Per test	$56.20	GP	Documentation required
97755	Assistive technology assessment	Per session	$62.80	GP	Documentation required

Highlighted rows: Codes identified in ZeeMed's [Client] CPT and Billing Configuration Review as requiring review and activation.
Source: 2026 Medicare Physician Fee Schedule, National Average, Non-Facility. Actual payment varies by ZIP code, payer, contract, and authorization.

Critical Billing Rules

1. GP Modifier Required
All OT claims must include GP modifier. Claims without GP will be denied by Medicare.

2. 8 Minute Rule
Applies to timed codes: 97110, 97112, 97129, 97130, 97530, 97535, 97537.
8 to 22 min = 1 unit | 23 to 37 min = 2 units | 38 to 52 min = 3 units

3. OT Evaluation Code Selection
97165 = Low complexity | 97166 = Moderate complexity | 97167 = High complexity | 97168 = Re-evaluation.
Time alone does not determine complexity. Must meet documentation requirements.

4. Documentation Requirements
Must include: Total time, skilled intervention, medical necessity, functional goals, and GP modifier.

Service to CPT Mapping ([Client] Configuration)

Approach: Provider facing service labels (such as OT Treatment, OT Feeding, OT Consult) should remain simple and intuitive. The CPT shown with a service is a **default association**. Final claim coding must be validated against documentation, authorization, and payer requirements.

Provider Facing Service	Default CPT	Billing Stage Approach
OT Treatment	97530	Validate against documentation and authorization
OT Feeding	97530	Validate actual service before claim submission
OT Consult	97530	Review actual service and applicable payer rules
OT ESY	97530	Keep program and service label; validate claim CPT
OT Class services	97530	Review group and direct service circumstances before billing

For [Client] Admin: Implementation Steps

Immediate Action Items (from ZeeMed Review):

1. Add and enable missing CPTs applicable to [Client] supported specialties.
2. Review existing service to CPT mappings, particularly OT services.
3. Ensure applicable OT evaluation levels (97165 to 97168) are available.
4. Confirm providers can select CPTs included in their authorizations.
5. Test provider service and rate configuration in Stage first.
6. Validate workflow in Stage before production deployment.
7. Monitor initial billing results and make controlled corrections.

Configuration Philosophy: Keep provider facing service catalog simple. Treat CPT shown with a service as a default association.
Final claim level coding remains subject to documentation, authorization, units, modifiers, and payer requirements.
