Subject: SDR Workflow Overview

Date: August 25, 2026

This document outlines the Sales Development Representative (SDR) workflow designed for the efficient handling of leads and ensuring successful live transfers to the client's closers using the **[Dialer Tool]**. The objective is to facilitate a seamless transition from lead reception to live transfer without scheduling, aiming for a high closing rate.

Daily Workflow Summary

- Leads per day: 3 to 4
- Goal: Live transfer to the closer or schedule demo according to calendar
- Tool: [Dialer Tool]

Step 1: Lead Reception and Preparation

Timing: Same day

Process:

- Receive the lead in the CRM / [Dialer Tool].
- Verify lead details: name, phone, time zone, and any notes.
- Prepare a 30 second introductory script:

"Hi [name], this is [SDR Name] from [Client]. You just signed up on [Client]. I have just 2 quick questions to see if I should get you to the right person right away. That cool?"

Step 2: First Call Attempt

Timing: Within 1 hour

Action: Dial via [Dialer Tool].

If Answered:

- Ask three qualification questions:
 - a. Are you currently using any solution for [pain point]?
 - b. Is solving this a priority in the next 7 days?
 - c. Do you have the authority to say yes to a short conversation?
- If YES to 2 of 3: Live transfer to closer immediately.

- If NO: Note the reason and schedule a callback for the next day.

If No Answer:

- Leave a voicemail (only on the first call) and proceed to Step 3.

Step 3: Follow-up Cadence

Duration: Max 48 hours · **Maximum Attempts:** 5 per lead

ATTEMPT	TIMING	ACTION
2nd	Day 1, 3h later	Call, no voicemail
3rd	Day 1, 6h later	Call + text (SMS)
4th	Day 2, 10 AM	Call + voicemail
5th	Day 2, 2 PM	Final call. If no answer, mark "callback declined"

Step 4: Live Transfer Rules

Transfer Conditions:

- Lead must be on the phone and engaged.
- Lead must confirm need, timing, and authority.

Warm Transfer Script:

"Hey [closer], [SDR Name] here. I have [name] on the line. They [pain point summary] and want to talk now. Transferring."

Do Not Transfer if:

- The lead is unsure, angry, or immediately asking for pricing. Instead, collect information.

Step 5: Daily Targets

- Live Transfers: 1 to 2 per day
- Reschedules: 0 (focus on live transfer only)
- Expected Close Rate: 30 to 40 percent of transfers

Tools and Tracking

Dialer: [Dialer Tool] (local presence, auto record feature)

CRM Updates After Every Call:

- Contact made? Yes / No
- Qualified? Yes / No
- Transferred? To whom + time

End of Day Report (SDR to [Sales Lead]):

- Leads received: X · Attempts made: X
- Live transfers: X · Closing result (next day): X

Success Metrics (Weekly)

METRIC	TARGET
Live transfer rate	20 to 30 percent of leads
Close rate from transfers	25 percent or higher
Time to first call	Less than 1 hour

This workflow is designed to optimize the lead handling process, ensuring timely follow ups and maximizing the chances of successful transfers and closures. The strategy aims for efficiency and high conversion rates to benefit both the client and the sales team.
